eka

The power of one.

Eka Business collaboration
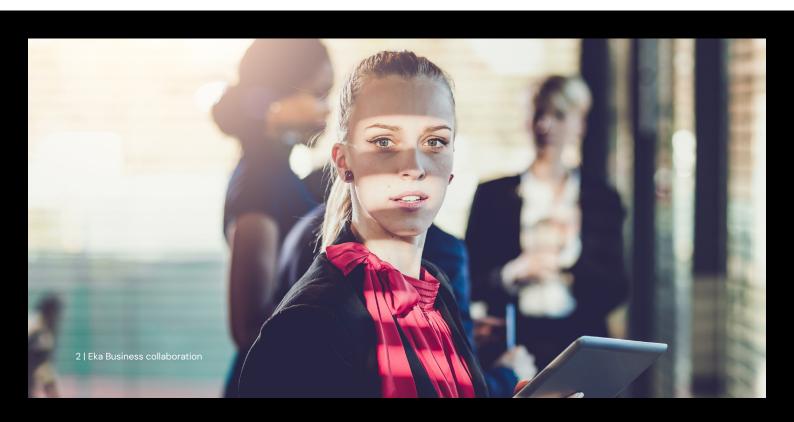

Connect. Collaborate. Communicate.

Digitally connect people, information, applications, and processes across your extended business network of consumers, partners, suppliers, distributors, and farmers.

Raw material and commodity businesses (from traders to supply chain to customers) across agriculture, energy, metals and mining, need to communicate in real time with their business partners to buy/sell, negotiate, manage supply chain operations and for financial settlements.

Get more out of your digital value chain through automated workflows, custom dashboards, real time chats with all counterparties, system integrations and analytics across the entire value chain to solve business problems more efficiently.

Key capabilities and use cases

Collaboration for contract management

- Automate digital commerce workflows for your extended business network to increase efficiency and profitability
- Create custom workflows and automate contract management for pre-trade, purchase, sales contracts and more
- Secure exchange of your critical documents with e-signatures, OCR and more on a single platform
- Get real-time information with custom dashboards

Collaboration for logistics

- Get complete visibility of your entire supply chain network of suppliers, logistics partners, freight forwarders, distributors and more on a single platform
- Automate workflows and manage supply chain operations such as requesting for shipment, freight booking, tracking, deliveries and more
- Create custom dashboards to view business critical information such as order movement, delivery status, transportation delays and freight status

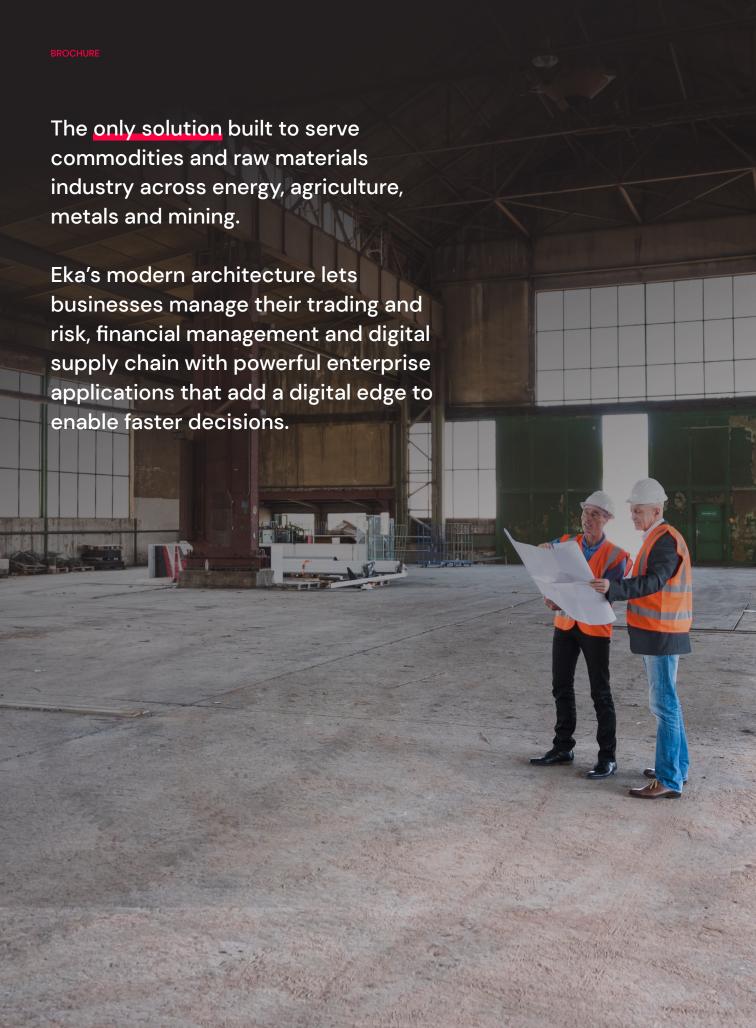

Collaboration for finance and fulfilment

- Integrate your accounting systems and automate workflows to manage invoices, payments, accounting, general ledger postings, reconciliations and more
- Get real time information on invoices, payment status and more designed for your business needs
- Draw insights into your account balances, risk exposure, lost discounts, reconciliation discrepancies and more for effective decision-making

The <u>only solution</u> built to serve commodities and raw materials industry across energy, agriculture, metals and mining.

Eka's modern architecture lets businesses manage their trading and risk, financial management and digital supply chain with powerful enterprise applications that add a digital edge to enable faster decisions.

Key benefits

Partner on-boarding

- Collaborate faster with multiple partners using our simple partner-onboarding process
- Personalize user experience with highly configurable registration page and role-based preferences
- Increase your business transparency and control with single security architecture for access and authorization

Workflow templates

- Improve operational efficiency through automated workflows customizable by role/function/industry
- Organize operations to create, modify, delete, and view business transactions

Interactive dashboards

- Make decisions on the go with omni-channel interface accessible over web, tablet and mobile
- Enhanced decision making with out of the box custom reporting and visualization capabilities
- Get deeper understanding of your business and market trends with advanced analytics and data management tools

Chat/share

- Enhanced chat functionality to collaborate with your business partners and traders
- Resolve your customer issues faster by enabling a unified back-office support
- Share news/information with different user groups by broadcasting in a seamless manner

Integrations

- Easily integrate our solution with your existing systems, third-party applications or workflow-specific systems using our pre-built connectors and open APIs
- Improve flexibility and scalability of your business with Eka's cloud-native solution with on-demand, extensible architecture

Data management

- Enhance data governance using Eka security framework for encryption, authentication, and authorization
- Stay up to date with automated schedulers which refresh data at required frequency
- Role, module and data level-based security for authentication and access

Alerts and notifications

- Respond faster by setting custom inbox style alerts
- Take prompt action by setting custom alerts for changing weather, risk policies, prices etc.
