eka

Se Sustainability and ESG

Eka's sustainability and ESG solution provide turnkey visualizations for different frameworks such as GRI, TCFD, SASB, IR, SDG, CDP, BRSR and many more.

Challenge

Sustainability is subject to a lot of attention but not a lot of clarity. Multiple reporting standards and manual and inconsistent ways of collecting critical sustainability information are the key challenges that organizations face. This results in the inefficient and duplication of data collection efforts and limits organizations' ability to gather real-time, actionable insights to make decisions.

Solution

Eka's sustainability solution is a cloud-based offering that facilitates ESG reporting and tracking across multiple standards and frameworks. The solution streamlines sustainability and ESG programs by providing turnkey visualizations in line with globally recognized standards such as GRI, TCFD, SASB, IR, GRESB, SERC, SDG, CDP, BRSR, and many more.

The key applications within the sustainability solution include Environment Sustainability, Corporate Sustainability, Health and Safety, and Risk & Monitoring. Each of these applications is tailored to get insights into the Environmental, Social, and Governance aspects of organizations as well as track the performance and breaches of various ESG parameters.

Technical specification
Data sources

- **Spreadsheets**
- **ERP systems – SAP, HR and Accounting systems**
- **Databases – Oracle, SQL Server**
- **Third-party data sources**
- **Out-of-the-box connectors**

Frequency

- **Realtime**

Corporate Sustainability	Environmental Sustainability	Employee health and safety
• Customer privacy • Ethics and compliance • Sustainable supplier management • Human rights	• Emissions management • Energy management • Material consumption • Water management • Bio-diversity • Effluents and waste management	• Occupational health and safety • Training of employees • Incident tracking and management

Eka's powerful platform helps in bringing in calculated measures, risk alerts, anomaly detection as well as possible predictive modelling to help make real-time decision making and future planning.

Product Intelligence

• Helps enterprises with ESG goal setting and measuring progress towards them
• Quantify the reduction in GHG emissions based on SBTi scenarios
• Track and manage compliances
• Restrict and curate access to insights and reports based on user roles

Key insights

• 100+ preconfigured reports on ESG parameters
• Provides turnkey visualization for 500+ ESG metrics
• 60+ inbuilt enrichments
• Carbon accounting, off-setting strategies, and reporting

• Materials management
• Scenario planning and forecasting Insights for Carbon net zero goals
• Sustainability sourcing, tracking
• Scenario Creation and AI models

Key features

Compliance
Comply with corporate reporting requirements as well as the GRI, UN SDG, CGP and any other standards, and report them accurately

Actionable insights
Drive initiatives including training programs, incident captures, and legal proceedings or take course correction measures when certain metrics are breached.

Self service
Freedom to create custom dashboards based on the individual or corporate

Alerts and notifications
Set alerts for breach of set standards or KPIs at real time, to reactive and proactive action enablement.

Auditor login
A dedicated auditor login, (with or) without editing rights can ensure fast and cost-effective auditing of your sustainability data and programs.

Aggregated information
Aggregate disparate data for a comprehensive view across Corporate & Social Sustainability, Environmental Sustainability & Employee Health & Safety – data ranging from data on human rights initiatives including parental leave, equal compensation, child labor incidents, and harassment, to greenhouse emissions, waste management, marketing, and labelling.

Eka Cloud Platform
Digitally connect and collaborate across your entire business network with one common experience, one security model and one integrated source of data. Eka's Cloud Platform automates processes, enhances insights and secures trusted data.
